 # A program to output 'Hi' 4 times on the same line

```
for i in range (1, 5):
    print ("Hi ", end = "")       # end = "" prevents the computer from automatically
                                  # moving the cursor to the next line after the data is
                                  # outputted
```
